SUMMARY

Experienced data analyst with skillset on interpreting and analyzing data in order to drive successfull business
solution and digital transformation.

EXPERIENCE

KPMG Global Services Pvt Ltd. - **Data Analyst**
Bangalore, India
09/2021 - Current

- I am a member of a specialized Data Analytics team, with a primary focus on tasks such as data modelling, data mapping, data management, data conversion, reporting, dashboard creation, and data manipulation. My proficiency in these areas is demonstrated through the use of SQL and Power BI.
- Developed a comprehensive automation process for streamlined access to financial reports by utilizing Power-shell scripting, SQL, MS Excel, and MS Forms.
- Performed ETL processes for unstructured data integration into SQL Server from diverse ERP systems, including SAP and Oracle EBS ERP, utilizing stored procedures. Additionally, established seamless data connections between ERP systems and BI tools to construct dashboards tailored to client specifications.
- Possesses hands-on experience with various SQL Server Services, SSIS and SSAS. Additionally, demonstrates a comprehensive understanding of data warehousing, data modelling concepts.

Accenture Technology Services - **Application Development Associate**
Bangalore, India
11/2019 - 09/2022

- Involved in building an SSIS Package for Multi-Client, Multi ERP F&A Tool ATCAT – Processing millions of records from different sources and migration of packages.
- Extensive experience with T-SQL in constructing Tables, implementing Stored Procedures, Functions, Views, User Profiles, Data Dictionaries and Data Integrity.
- Engaged in optimizing query and procedure performance, with exposure to statistics and the regular creation, rebuilding, and reorganizing of indexes.
